

High school in Kashitu

PRATELE
NEW RENATO, z. s.

Kashitu

A community in Central Province (Zambia)

- population 18.000 (data 1/2020)
- area 237 km²
- road, railway links
- local non-profit organisation
New Renato Community Society

Volunteers accompanying foster families discuss the new high school

What is the New Renato Community Society?

- a not-profit organisation in Kashitu created by local volunteers, founded in 1987
- forms a significant element of development in rural part of Zambia

The NCRS's activities:

- they built and run 2 elementary school, 2 nursery schools and a community centre
- agricultural courses, education (including how to save money), health care and ensuring young people's nutrition and development

The NRSC's partners:

- DAPP/ZAMFAM (*Development Aid People to People* *Zambian Families*), Salvation Army in the STEPS OVC, National AIDS Council; GB: Sambilila Partnership, Kaloko Trust, Německo: Fountain of Life, Misereor, ČR: Přátelé New Renato

NEW RENATO COMMUNITY CENTRE

RENATO ELEMENTARY SCHOOL

CHRISTINE NURSERY SCHOOL

Why a high school in Kashitu?

- no high school in a 40 km radius – little chance to start and develop one's own business in the region
- number of elementary schools in Kashitu: 7, a total of 2968 pupils (as of 11/2019)
- the vast majority of parents cannot afford transport to the cities, let alone school fees and accommodation for their children

How?

- with a maximum of involvement and self-help on the part of locals
- run by the experienced local non-profit New Renato Community Society
- building systems based on local people's experience
- part of the school will be open to the public so they can use its facilities

To create an educational and development
centre for the region

The Kashitu high school project is based on the principles of a development project:

Knowledge of conditions based on the realities of the given country

Finding an organisation to run the project after implementation: the experienced non-profit NRCS

Climate conditions in the area of the building

Involving local people in the design and construction of the building

Laws and regulations of the given country and the locality of the project

Knowing the way of life of the people for whom the project is designed

Accentuating sustainability principles (permanently sustainable development)

Effective use of local resources and raw materials

Education in developing countries is important, because it:

- develops the personality
- improves critical thinking
- is the foundation for regional development
- enables economic growth and better living conditions

Education in African countries - statistics

- Africa has the greatest percentage of students without access to formal education: 20% (over 1/5 of children aged 6 -11 and 1/3 aged 12 – 14, or approximately 32 mil. children)
- literacy among pupils of both sexes in Sub-Saharan Africa is 76.78% (the global average is 91.67%)
- girls spend 16.3% more time away from school than boys
- in the African environment there is a lack of teachers to cover elementary education (c. 6.3 mil)
- circa 1/2 of elementary schools have no access to drinking water
- the great majority of schools are not connected to electricity

Design for the high school in Kashitu

- amended after a visit to the locality and consultation with local authorities in summer 2018
- extended in accordance with new legislation

Planned facilities:

- 6 classrooms + 3 laboratory classrooms (woodwork, metalwork, cooking)
- offices, staff rooms, meeting room
- sleeping accommodation for boys and girls
- houses for 16 teachers, a house for a porter and a caretaker, 2 houses for volunteers
- doctor's surgery, pharmacy, sick bay
- dining room and kitchen
- toilets

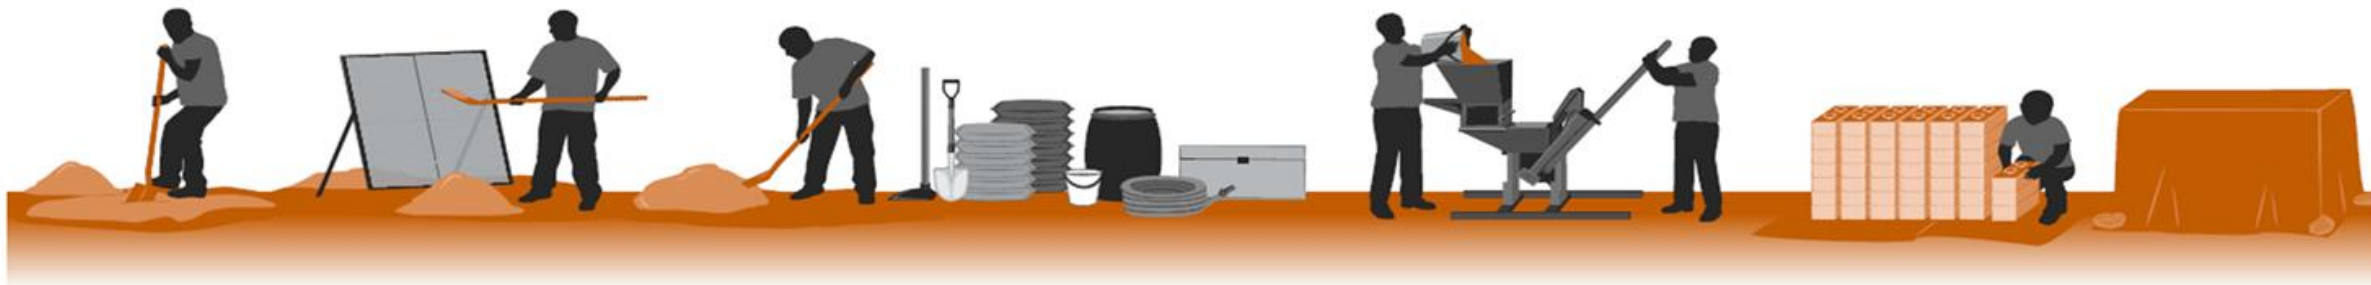

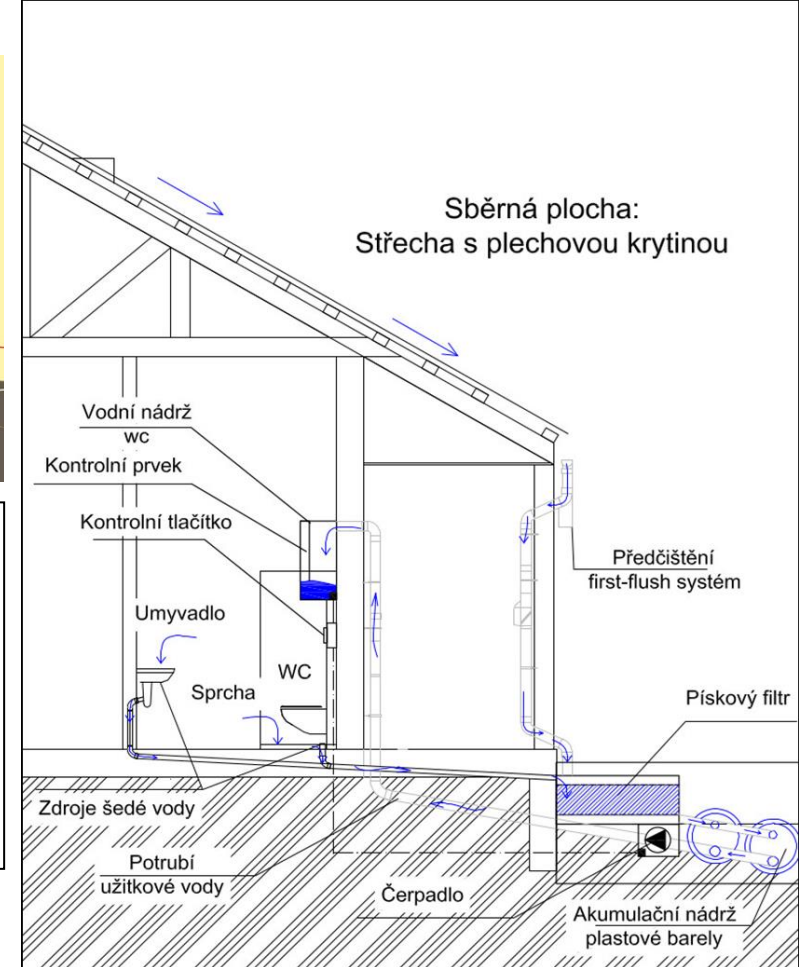

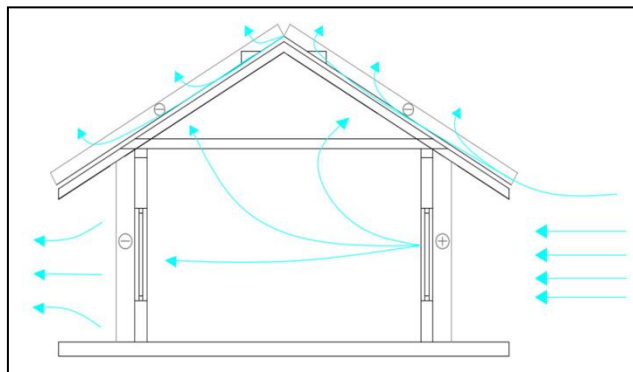

- the school's capacity is for 250 students studying for five years
- daytime and accommodation areas for all students and teachers

Construction phases:

1. Construction of a workshop, a building with classrooms + fencing
2. Construction of essential buildings for 3 years of operation
3. Overall completion

The project includes

- construction system - foundations, walls, roof
- drinking water supply system
- waste water treatment
- ventilation system
- optimisation of acoustics
- sufficient lighting using daylight

Timetable and budget for the first stage (summer 2022)

- training for workers from Kashitu - they will gain the necessary knowledge and experience to create good-quality products
- purchase of initial raw materials
- construction of a workshop, a building with classrooms and fencing

Budget:

A detailed budget has not yet been drawn up (estimated 1,5 mil. CZK)

How will we build the school?

- by involving local people, who will build after training
- by working with professionals, volunteers and other organisations
- fundraising activities (ball, public collection)
- searching for partners
- lectures and creation of media documentaries
- by selling gift items

cooperation with
architects and
construction
engineers

cooperation with Mendel
University in Brno

documentary film Bemba: Waiting for Godot
(written and directed by Monika Höferová),
broadcast on Czech Television

Help us

- 1) be a **volunteer** at our fundraising events (stalls, ball) and / or with making the items that we sell to raise funds
- 2) **share** our posts on our website and facebook, actively invite your friends to our events
- 3) **Donate regularly** at the public collection bank account no.: **2601117078/2010** IBAN: CZ32 2010 0000 0026 0111 7078 SWIFT/BIC: FIOBCZPPXXX – we will provide you with a receipt enabling you to deduct it from your tax base
- 4) with our accounting
- 5) become members of our association and be a part of the implementation team
- 6) Recommend us:
 - experts who can help us achieve our goals (PR, marketing),
 - companies and firms interested in the idea of social responsibility and development aid involving the priority - education
